- ③ Insert the Micro USB into the dash cam USB port  
(Charger Specification: In: DC 12-24V, Out: DC 5V 2A)

### PLEASE NOTE:

1. The battery takes about two hours to be charged fully.
2. When the battery is charging, the indicator light on the top left of the screen will be stayed red; When it charged fully, the light goes off.
3. To avoid damage to the device, please do not charge the battery via the USB data cable with other adapters.

## RECORDING MODE SETTINGS

---

Press the menu button  one time to enter to this mode, and press  or  to choose the option.

### 1. Resolution - 1080FHD / 720P / VGA three optional

- Default setting is 1080FHD.

### 2. Loop Recording - off / 1 minute / 3 minutes / 5 minutes four optional

- Default setting is 3 minutes.

- The files will be saved every 3 minutes if you choose 3 minutes. When the memory card is full, the new files will cover the old one if the loop recording is on, if it is off, then the camera won't work any more, please format the SD card or change a new one.

### 3. WDR (Wide Dynamic Range)

- Default is on.
- Balance light and darkness in driving to get the best image automatically.

### 4. Audio Recording

- Default is on.
- Allows you to enable or disable audio recording with your videos.

### 5. Date Stamp

- Default is on.
- Stamp the date and time to the videos.

### 6. G-sensor - off / low / medium / high four optional

- Default is off
- Gravity Sensor means any collision will activate the camera to record, and the videos will be locked which will never be covered by new files.
- The video is stored as a file every three minutes. When driving, if the road is bumpy, please adjust it to low or turn off it directly to prevent the camera doesn't work because of the memory card is full. When parking, recommend you to adjust it to medium.

## 7. Parking Monitor (default is off)

- Default is off
- When there is no power input and the camera has been turned off, the camera will be turned on automatically and start recording, the video will be saved and the camera automatic shutdown after 30 seconds
