FRAME OVERVIEW

WALL MOUNTING GUIDE

1. Preparing for Installation

Before you get started, it's important to make sure you have everything you will need.

① Make sure the following accessories are included in the package:

- Metal Wall Mount × 1
- Screw kit (Anchor + Long Screw) × 4
- Frame back bracket × 1
- Short screw × 4
- Spring washer × 4

② Make sure you have the following tools on hand:

- Electric hand drill
- Hammer
- Phillips screwdriver

2. Installing the Metal Wall Mount

- ① Determine the installation location. Place the photo frame against the wall, ensuring there is proper space between the four sides of the frame and the wall.
- ② Drill mounting holes. Remove the photo frame and determine the installation position of the wall mount according to the position of the photo frame. Attach the wall mount to the wall in a "V" shape (with the big opening facing up), and mark the four mounting holes of the wall mount on the wall. Use the electric drill to drill holes into the wall.

- 1 15.6" Touch Screen
- 2 Remote Control Sensor
- 3 Power Button
- 4 Screw Hole for Metal Back Bracket
- 5 Speakers
- 6 Stand Positioning Hole
- 7 Screw Hole for Stand
- 8 SD Card Slot
- 9 3.5mm Headphone Jack
- 10 USB Port
- 11 Mini USB Port
- 12 DC Power Port

BACK STAND INSTALLATION GUIDE

Push the stand into the stand positioning holes, put the fixing screw into the screw hole, and then fix the stand by tightening the screw.

- ③ Install the anchors. Use a hammer to tap the four anchors into the four holes drilled in the previous step.

- ④ Secure the wall mount. Attach the wall mount to the wall in a "V" shape (with the big opening facing up), and drive the four long screws into the anchors to fix the wall mount on the wall.

3. Installing the Frame Back Bracket

- ① Lay the photo frame face-down on a flat surface. The power button should be in the upper left corner.

- ② Attach the back bracket to the back of the photo frame. Place the spring washers under the screw heads, and use a screwdriver to tighten the 4 short screws on the back of the photo frame.

4. Attaching the Photo Frame to the Wall

- ① Plug the power cord into the DC IN port on the photo frame.
② Hold the photo frame with the display screen facing towards you.
③ Put the frame back bracket a little bit higher than the wall mount, align the frame back bracket with the wall mount, slide down slowly to hang the frame on the wall.
④ Installation is complete.

GETTING STARTED

1. Powering on

Connect the power cable to your frame and plug the power adapter into a wall outlet, the frame will enter the system in seconds.

2. Initial settings

There are several initial settings (Wifi, Device info, Sleep Mode, etc.) when you enter the system for the first time.

3. Connecting to Wifi

Select the Wifi network you would like to connect to and enter the password if required. If your Wifi network is not on the list, move your frame closer to your router, wait for seconds and check it again.

Note:

- ① Classic 15 supports 2.4GHz Wifi networks only.
- ② A private Wifi network is highly recommended.

OURPHOTO APP

1. Downloading the OurPhoto app

Please download and install the OurPhoto app on your smartphone or tablet by searching OurPhoto on the App Store or Google Play.

2. Creating an OurPhoto account and log in

- ① Open the OurPhoto app, select Sign Up and fill in all the required information (if you already have an account, please log in directly).
- ② Click the right arrow icon to verify the email address you provide. A verification code will be sent to your email address.
- ③ Collect and fill in the verification code, then click Submit to complete the account registration.

3. Inviting friends to download the app and log in

Your friends and family can also send pictures or videos to your photo frame via the app. They'll need to download and install the OurPhoto app, create an account, log in to their account, and bind your frame (Please refer to "Invite others to bind your frame with the app" below).

BINDING YOUR FRAME

1. Binding your frame with the app

The following instructions are only applicable to the frame owner or the user who is the first one to bind the frame.

- 1 Please confirm you have logged in the OurPhoto app.
- 2 Select Devices.
- 3 Click the "+" next to **My Devices**.
- 4 Enter the Frame ID.

Note: Frame ID is a 6-digit series number which can be found in your frame, go to Settings → Device Info.

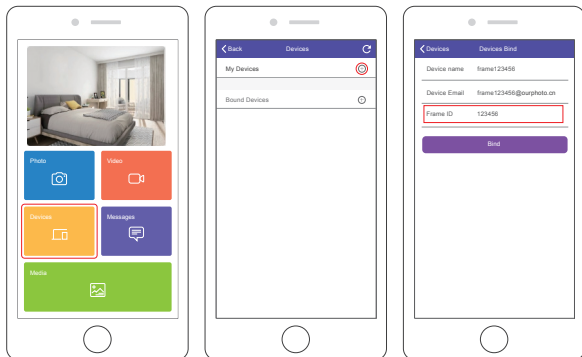

- 5 Create a Device Name for your frame.

Note: We recommend you to name your frame after the Frame ID for easy identification, for example, if your Frame ID is 123456, please name your frame Frame123456.

- 6 Create a unique email account for your frame.

Note: We recommend you to create the account with the Frame ID for easy identification, for example, if your Frame ID is 123456, please create an email account frame123456@ourphoto.cn.

- 7 Then click Bind.

- 8 Confirm the binding request on your frame, go to Settings → User Management → Pending User Requests, click Accept.

Note: Please make sure that you turn on the "Accept New Users" to accept the binding request.

- 9 Now this account is bound to your frame, and it will be the main account of your frame.

Note: The above screenshot is for reference, please update to the latest firmware version.

2. Inviting others to bind your frame with the app

The following instructions are only applicable to the non-frame owner to bind the frame. And binding requires the frame owner to operate and confirm on the frame.

Here is what your friends should do:

- 1 Download and install the OurPhoto app.
- 2 Create a new OurPhoto account and log in. Go to Devices → Bound Devices, and then click "+".
- 3 Enter the frame ID number of your frame.

Note: Frame ID is a 6-digit series number which can be found in your frame, Settings → Device Info. Please send this Frame ID to your friends.

- 4 Create a Device Name for the frame.

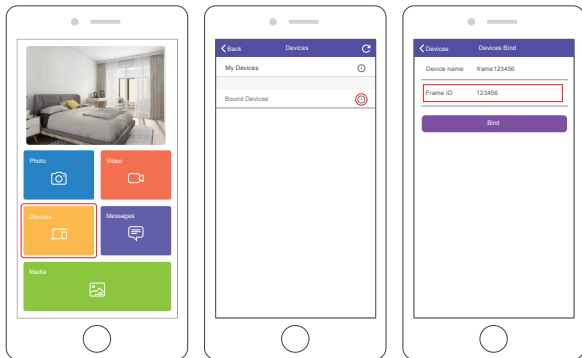

Note: We recommend your friends to name the frame after the Frame ID for easy identification, for example, Frame ID is 123456, please name the frame Frame123456.

- 5 Then click Bind.

On your frame, you'll need to confirm your friend's binding request. Go to Settings → User Management → Pending User Requests, click Accept.

Then your friends and family will be able to share photos directly to the frame from anywhere in the world.

You can find the bound users in the User Management interface.

Note: The above screenshot is for reference, please update to the latest firmware version.

3. Binding your frame with Email

You and your friends can also bind your email accounts to the frame, so that you can share photos to the frame via email.

- ① Send an email with the subject "**bd + Frame ID**" to the email account of your frame (the one you created when you bound your frame). For example, if your Frame ID is 123456, thus send an email with the subject "**bd123456**" to the email account of your frame.
- ② Wait for seconds, you will receive a confirmation email from the OurPhoto team, and your email account is successfully bound to the frame. You can also find the bound email accounts in the User Management interface.

UPLOADING PHOTOS AND VIDEOS

1. Uploading photos and videos via the app

- ① Open the OurPhoto app and log in to your account. Make sure you have bound your account to your frame before.
- ② Click Media to upload your photos or videos in your smartphone or tablet. Select the photos or videos you would like to upload, and choose the frame you would like to send to. Click the right arrow icon to confirm.
- ③ Click Photo or Video to take new photos or videos, and choose the frame you would like to send to. Click the right arrow icon to confirm.
- ④ Your photos or videos will be received in seconds, you can check the photo or video library on the frame.

Note:

- The video clip is limited to 30 seconds or 100MB.
- The app supports sending Full Image to the frame. Please make sure your app version is 1.1.94 (iOS)/ 1.0.4 (Android) or above.
- The OurPhoto app only provides 10GB free data traffic for uploading photos and videos, please go to the OurPhoto website and top up the data traffic if needed.

Top-up link: <https://well.bsimb.cn/recharge/index>

2. Uploading photos via Email

Send an email with photos attached to the email address of the frame. Your photos will be received in seconds, you can check the photo or video library on the frame.

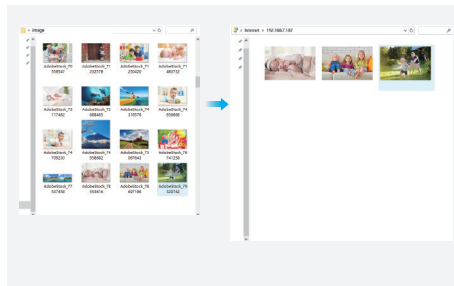

Note: Videos cannot be uploaded via email.

3. Uploading photos and videos via a computer

- ① Make sure your frame and computer are on the same Wifi network.
- ② On your frame, enter the PC Control interface, go to Settings → PC Control. Click the Start button, you will find an FTP address on the screen.
- ③ On your computer, open File Explorer. In the File Explorer, enter the FTP address in the address bar.
- ④ Then you can drag and drop the photos and videos on the computer that you would like to transfer to the folder showed up.
- ⑤ Click Stop on the frame to end PC connecting and uploading.
- ⑥ Your photos or videos will be received in seconds, you can check the photo or video library on the frame.

Note: The above screenshot is for reference, please update to the latest firmware version.

4. Uploading photos and videos via a USB drive

- ① Insert the USB drive into the frame, and wait for seconds, the frame will let you know when the USB drive is successfully connected.
- ② Enter the Photo or Video library, click USB and you will see all the photos or videos stored in the USB drive.
- ③ Click the More icon at the upper right corner, and select the photos or videos you would like to import to the internal memory of the frame.
- ④ Click the Share icon at the top then choose OK to import the photos or videos.
- ⑤ Your photos or videos will be received in seconds, you can check the photo or video library on the frame.

Note:

- If you have too many files stored in the USB drive, it will take more time to read.
- The system will protect and lock the USB drive if there is no action after the USB drive has been plugged in for a while. To activate it, you need to take it out and plug it in again.
- Please remove all your external devices when you reset the photo frame.

Note: The above screenshot is for reference, please update to the latest firmware version.

5. Uploading photos and videos via an SD card

- ① Insert an SD card into the frame, and wait for seconds, the frame will let you know when the SD card is successfully connected.
- ② Enter the Photo or Video library, click SD card and you will see all the photos or videos stored in the SD card.
- ③ Click the More icon at the upper right corner, and select the photos or videos you would like to import to the internal memory of the frame.
- ④ Click the Share icon at the top then choose OK to import the photos or videos.
- ⑤ Your photos or videos will be received in seconds, you can check the photo or video library on the frame.

Note:

- Max support a 32GB SD card.
- If you have too many files stored in the SD card, it will take more time to read.
- The system will protect and lock the SD card, if there is no action after the SD card has been inserted for a while. To activate it, you need to take it out and insert again.
- Please remove all your external devices when you reset the photo frame.

DELETING PHOTOS AND VIDEOS

1. Deleting files in the Photo or Video library

- ① Enter the Photo or Video library and choose Internal Storage, you will see all the photos or videos stored in the internal memory.
- ② Click the More icon at the upper right corner, and select the photos or videos you would like to delete from your frame.
- ③ Click the Delete icon at the top then choose OK to delete the photos or videos.

2. Deleting files on a slideshow

- Please do not control the frame by using the remote and touching the screen at the same time.

FAQ

1. Do I have to keep this photo frame plugged all the time?

Yes, you have to keep it plugged in to keep the frame on as it has no built-in battery.

2. Does this frame have to be Wifi connected to work or just in the setup process?

This frame needs to connect to a Wifi network for setup, receiving new photos/videos, receive user requests and software updates. Other than that, the frame can play photos or video without a Wifi connection.

3. Why this frame cannot connect to Wifi?

It supports only 2.4GHz Wifi network, select the Wifi network you would like to connect and enter the password correctly if required. If your Wifi network is NOT on the list, move your frame closer to your router or restart your frame, wait for seconds and check it again.

4. Can this frame be hung on the wall?

You can hang it on the wall by the wall mount hole on the back.

5. Can I place the frame in portrait or landscape position?

It can be positioned landscape or portrait after the Auto-rotate setting is on.

6. Where can I find the Frame ID?

Frame ID is a 6-digit series number which can be found in your frame, go to Settings → Device Info.

7. Why I cannot bind my frame via the app?

If you are the frame owner or the first to bind the frame, please follow the

instructions **"Binding your frame with the app"** to bind the frame, if you are not the frame owner, please follow the instructions **"Inviting others to bind your the frame with the app"** to bind the frame. After sending binding request from the app, it requires the frame owner to operate on the photo frame and click **"Accept"** under the User Management menu. If the binding succeeds, the user account will appear on the Users.

8. How do I unbind an account?

If you would like to unbind an Email or app account, please go to the User Management menu and click the bound user you want to delete, you will see there is an option for deleting users.

9. Can I share photos and videos to the frame?

Yes, you can share both photos and videos (max 30 seconds or 100MB) to the frame.

10. Can I transfer photos or videos from a computer?

Yes, you can transfer your files from your computer by using the PC Control feature, but this feature is only available to Windows system now.

11. Where do the photos and videos store?

All the received photos and videos will be stored in the built-in 16GB SD Card. It is estimated to keep over 40,000 photos of 300KB/pc. The Dragon Touch server will only cache the data for 30 days, and all the photos will be encrypted and deleted after 30 days. It can enable your photo frame to receive the photos sent when the photo frame is offline.

12. How can I delete photos and videos?

Enter the Photo or Video Library, click **"more"** button on the top. Select the photos or videos you would like to delete and click **"delete"**.

13. Can I export the photos and videos?

You can export photos and videos via an SD card (max support 32GB) or a USB drive. After you have inserted your SD card or USB drive, you can select the photos and videos you would like to export in the library, click **"share"** to export your files.

14. Is it possible to manage the photos and videos in the frame remotely?

You can only manage/export/delete photos and videos in the frame directly.

15. Can I change the image transitions and displaying speed?

You can choose your preferred slideshow mode, interval and transition effect in Album Settings.

16. Can this frame automatically turn on/off at a specific time?

You can go to the Auto On/Off setting and set the auto on/off time as you want.

17. Can I cycle pictures and videos together?

You could only play photos or videos separately.

If you cannot find the answer to your question, please contact our customer support team, thank you.
